**Paper capacity**

- Approx. 6.8kg

**Paper weights**

- Multiple copy: 60-105g/m
- Reduction: 0.866/0.816/0.707/0.500
- Enlargement: 1.154/1.224/1.414/2.000

**Connection mode**

- Max. A3 to max. A3
- Sending size: 201x100dpi, 200x100dpi, 400x100dpi, 600x100dpi
- Receiving size: 200x100dpi, 200x200dpi, 400x400dpi, 600x600dpi
- Resolution: 200x100dpi, 200x200dpi, 400x400dpi, 600x600dpi
- Data format: TIFF-F

**Power requirements**

- AC220-240V 10A (50Hz)
- 1.56kW or less

**Dimensions (W x D x H)**

- 685mm x 823.7mm x 895mm

**Weight**

- Approx. 97kg

**Networking**

- Ethernet: 10BASE-T / 100BASE-TX / 1000BASE-T

**Output size**

- Image loss

**Enlargement**

- 1:1.154/1.224/1.414/2.000

**Reduction**

- 1:0.866/0.816/0.707/0.500

**Resolution**

- 200×100dpi, 200×200dpi, 400×200dpi, 600×200dpi

**Data format**

- TIFF-F

**IP Address Fax (Option) Specifications**

- Transmission protocol: PCL, PS
- Transmission size: Max. A3
- Resolution: 200×100dpi, 200×200dpi, 400×200dpi, 600×200dpi
- Data format: TIFF-F

**Scanning Function Specifications**

- Image size: Max. A3
- Scan resolution: 200x100dpi, 200x200dpi, 400x400dpi, 600x400dpi
- Speed (A4 crosswise): 50ppm (600dpi), 70ppm (400dpi, 300dpi, 200dpi)

**Fax Function Specifications**

- Transmission protocol: PCL, PS
- Transmission size: Max. A3
- Resolution: 200×100dpi, 200×200dpi, 400×200dpi, 600×200dpi
- Data format: TIFF-F

**Converting paper weight**

- Multiply g/m² weight x 0.636 x 0.939 (1kg = Approx. 1.66g/m²)

**Product appearance, configuration and/or specifications are subject to change without notice.**

**KONICA MINOLTA** is a registered trademark of KONICA MINOLTA HOLDINGS, INC. KONICA MINOLTA products are designed with the environment in mind. From consulting, system design, to operations, Konica Minolta offers total support to optimise your office output environment.

Ready for Any Line of Business

The business world doesn’t wait in line. To stay at the lead, your entire office needs to be connected from wherever they are, with the confidence that their data is secure. Now, there’s a new bizhub to bring you all together. The bizhub 501 features advanced security functions, flexible networking for users to share and distribute data across your entire enterprise, and high-quality output at your command, opening up new business possibilities at every turn. Lastly, the integration of 360-degree design functionality will put bizhub at centre stage in your office.

bizhub 501
Measure Success in Black & White

Windows Vista Compatibility (XPS, DPWS)
Gigabit Ethernet
Enhanced Security
- Built-in Authentication
- Biometrics / IC authentication
- Data Encryption
IPv6 Compatibility
Universal Design Improvements

Stylish and Functional Exterior Design
Seamless Construction
Large Full-color Control Panel
Flexible Communication
- Multi-Method Send
- Versatile Network Scanning
- HDD Box Functions
- Network Fax

Konica Minolta’s solutions of i include our extensive lineup of MFPs, printers and software applications designed for you, the individual.

**Data Sharing and Communication**

**Enjoy a Streamlined Office Workflow**

The bizhub 501 is a dynamic communication centre, allowing information to be stored, accessed, distributed or routed to any destination, whether across your office or on the other side of the world.

**Flexible Communication**

From the moment data is scanned, users may send it to any destination they choose, or distribute it to multiple recipients with a single operation. Data may be sent directly to networked PCs throughout the office, saved to public or private folders inside the bizhub HDD, e-mailed to addresses outside the office, or any combination of these at once. In addition, with the XPS data format, users can compress scans to ensure easy data transmission and storage.

- **Multi-method Send**
  - Scan to e-mail
  - Scan to FTP
  - Scan to SMB
  - Scan to WebDAV
  - Scan to Box
  - Scan to USB memory
  - TWAIN scan
  - XPS compatible (Optional HD-509 required)

**Save, Send and Share**

HDD Box functions turn bizhub into a central data resource, where information can be archived, protected, distributed or output. Furthermore, the print and routing function allows documents of separate formats to be printed together quickly and easily.

- **Sharing Box**
- **Personal Box**
- **Secure Box**
- **Bulletin Board Box**
- **Pulling Transmission Box**
- **Memory Reception Box**
- **Confidential Box**
- **Bind Printing**
- **PageScope BOX Operator**

**Fast, Convenient File Transfer**

The high-speed USB port located at the front allows users to print PDF, TIFF and XPS data directly from a storage device, or scan it directly to a storage device without a PC or server. With gigabit ethernet compatibility even large files can be transmitted anywhere quickly.

- **G3 Fax (Optional FK-502, MK-708 required)**
- **Internet Fax (Optional IC-207, HD-509 required)**
- **IP Address Fax**
- **PC Fax**
- **TSI Routing (Optional HD-509 required)**

**Link Your Office to the World**

In addition to traditional high-speed fax functions, the office network infrastructure can be used for fax transmission, enabling greater speed at a much lower cost. With Internet and IP address fax, data is sent via the Internet or local servers, eliminating transmission costs. PC fax allows users to send data directly from their PCs, and with TSI Routing incoming transmissions can be forwarded to the recipient’s PC or HDD Box.

**The Power of bizhub OP - New Open Platform**

Konica Minolta's exclusive bizhub OP control system empowers your office to achieve its potential through increased productivity, security and connectivity. bizhub OP's three-tiered system, each of which provides a seamless consolidation of functions that translate to a work with greater flexibility. The Combined bizhub Architecture integrates control of all functions, enabling more efficient operation, greater reliability and increased security, and more effective administrative oversight and accounting. The Enhanced Print System integrates output operations within a single interface, allowing users to better take advantage of all output features. Finally, the Open Application Programming Interface makes bizhub OP more flexible by enabling third-party applications to easily implement customisation and integration with third-party applications. Supporting bizhub OP is anworld-class infrastructure, bizhub OP is designed to be a trusted network environment that allows users to work safely and effectively.

**Security**

Create a Stronger Line of Defense

A strong security system should create a safe environment where your team can exchange information freely and openly, while preventing unauthorised access. bizhub provides a range of security features as versatile as its communication and output capabilities, allowing you to work without restriction and without worry.

**Comprehensive Security for Your Entire Office**

Using advanced security features like encryption, password protection and user authentication, bizhub keeps data safe while still enabling users to work at peak efficiency.

- **User authentication**
- **Server authentication**
- **Biometric / IC Card authentication**
- **IP User Group**
- **POP before SMTP**

Data encryption ensures that none of your data can be accessed without permission.

- **SSL / TLS, encrypted transmission**
- **S / MIME**
- **PDF encryption**

HDD data is kept safe

- **HDD password lock**
- **HDD data encryption**
- **HDD random access format**

Hold sensitive print data until you’re ready

- **Secure print password protection**

Let your staff reach their potential in a secure environment

- **Security log**
- **ISO27001 (EAL3) certification**

**Secure Print**

Bring Ideas Together

bizhub is a central data resource enabling a universal enterprise-wide flow of information.

**G3 Fax / Internet Fax / Network Fax**

**Flexible Communication**

**Comprehensive Security for Your Entire Office**

**Multi-method Send**

**Save, Send and Share**

**Fast, Convenient File Transfer**

**Link Your Office to the World**

**Personalised Authorisation**

Reading the unique patterns of each user's fingerprint obviates the need for passwords, while ensuring each individual has the proper network access.

**Flexible and Dynamic Security**

Users can be quickly and conveniently identified before access is granted, allowing administrators to better manage access privileges and network activity.

- **Bind Printing**
- **PageScope BOX Operator**

**Save, Send and Share**

HDD Box functions turn bizhub into a central data resource, where information can be archived, protected, distributed or output. Furthermore, the bind printing function allows documents of separate formats to be printed together quickly and easily.

**Link Your Office to the World**

In addition to traditional high-speed fax functions, the office network infrastructure can be used for fax transmission, enabling greater speed at a much lower cost. With Internet and IP address fax, data is sent via the Internet or local servers, eliminating transmission costs. PC fax allows users to send data directly from their PCs, and with TSI Routing incoming transmissions can be forwarded to the recipient’s PC or HDD Box.

- **G3 Fax** (Optional FK-502, MK-708 required)
- **Internet Fax** (Optional IC-207, HD-509 required)
- **IP Address Fax** (Optional FK-502, MK-708, IC-207, HD-509 required)
- **PC Fax**
- **TSI Routing** (Optional HD-509 required)

**High-speed USB**

Gigabit ethernet compatibility

**PageScope Direct Print**

*Optional HD-509 required

**Secure Print**

Password protection, document locking, remote erasing

**Personalised Authorisation**

Reading the unique patterns of each user’s finger veins obviates the need for passwords, while ensuring each individual has the proper network access.

**My Panel Manager**

Controls authentication data for multiple MFPs on a network and enables the simple and efficient setting of authentication data for each user. This helps to integrate and streamline user management.

**PageScope Account Manager**

Enables aggregate analysis and management of network devices. Analysing detailed usage conditions, estimating costs, and graphing the aggregate results help to reduce unnecessary costs and to manage costs on a group basis.

**Enterprise Suite i-Option**

**Net Care Device Manager**

A firmware application that simplifies MFP setup and routine maintenance. It allows system administrators to efficiently create initial settings for devices managed by PageScope Suite Enterprise, and streamlines device control.

**Authentication Manager**

Controls authentication data for multiple MFPs on a network and enables the simple and efficient setting of authentication data for each user. This helps to integrate and streamline user management.

**My Panel Manager**

Customises the bizhub control panel setting for each user, and simultaneously stores the customised settings in multiple bizhub devices. The settings can be created from the administrator’s PC screen.

**PageScope Account Manager**

Enables aggregate analysis and management of network devices. Analysing detailed usage conditions, estimating costs, and graphing the aggregate results help to reduce unnecessary costs and to manage costs on a group basis.

Document Output

The Quality You Expect from bizhub

bizhub has always been synonymous with productivity, and the bizhub 501 delivers the same level of output that users have come to depend on. With high-speed processing that handles multiple complex jobs with ease and print quality that meets even demanding needs, bizhub will never make you compromise.

**New Design**

The bizhub Style of Business

bizhub 501 takes centre stage with a radically new design. Incorporating new functional elements and refinements to provide complete access, blended with sleek styling that complements your office interior, the new bizhub is built to impress.

**Emissions reduction**

RoHS Compliance

The bizhub 501 complies with the European Union’s Restriction of Hazardous Substances (RoHS) directive, prohibiting the use of certain hazardous materials in electrical and electronic products. Konica Minolta is committed to reducing its environmental impact and follows RoHS guidelines before the EU deadline by refraining from the use of lead, mercury, cadmium, hexavalent chromium, PBB and PBDE.

**Energy conservation**

Energy Star

The bizhub 501 complies with the International Energy Star Program’s stringent guidelines for reduced energy consumption and improved efficiency.

**WEEE Compliance**

The bizhub 501 complies with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

**Blue Angel**

The bizhub 501 is currently undergoing certification for Blue Angel (BAM2004) guidelines for efficiency and environmental responsibility.

**Energy Conservation**

The lower fixing temperature of Simitri toner greatly reduces energy consumption compared to conventional fixing. In addition, the Low Power and Sleep modes use significantly less power, resulting in lower energy costs and less waste.

**Energy Star**

The bizhub 501 complies with the Energy Star Program’s stringent guidelines for reduced energy consumption and improved efficiency.

**WEEE Compliance**

The bizhub 501 complies with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

**RoHS Compliance**

RoHS (Reduction of Hazardous Substances) rules prohibit certain materials from being used during the production of electrical and electronic components. Konica Minolta is committed to minimising the environmental impact of our devices on all fronts. The bizhub 501 is the ideal choice for offices that wish to reduce waste and emissions without trading performance.

**Dependable Output**

With an output speed of 50 ppm, the bizhub 501 can meet the needs of even the most demanding office environments. Both models offer high-quality document creation, with copy resolution of 600 dpi x 600 dpi, and digital smoothing enabling print resolution of 2400 dpi equivalent x 600 dpi.

**High Workload Capacity that Won’t Slow Down**

In addition to two 500 sheet universal trays and a 150 bypass trays, optional paper trays provide a maximum capacity of 5,650 sheets, more than enough for even the biggest jobs. Paper and toner can also be changed without interrupting output, bringing downtime to a minimum.

**Getting a Better Look**

The new 8.5-inch, 800 x 480 full color display panel with touch-screen gives users the ability to preview before they print or send documents, and makes navigation to desired documents simple and intuitive. For easier access, it can be set to a wide range of angles and heights, and offers an enlarged text mode.

**Get a Better Look**

The new 8.5-inch, 800 x 480 full color display panel with touch-screen gives users the ability to preview before they print or send documents, and makes navigation to desired documents simple and intuitive. For easier access, it can be set to a wide range of angles and heights, and offers an enlarged text mode.

**Multi-Job Function**

While an active job is being processed or output, the Multi-Job Function allows you to queue up to 94 other print or scan jobs to reduce waiting time.

**Universal Tray (500 sheets, A3-A5)**

Large Capacity Unit LU-203 (2,000 sheets, A4)

Multi Bypass Tray (150 sheets, A3-B6)

Paper Feed Cabinet PC-407 (2,500 [1,250 x 2] sheets, A4)

**The Finishing Touch**

A wide array of optional finishing units allow you to produce professional-looking, high-quality documents that will increase the value of your output irreversibly. In addition to sorting and grouping, folding, hole punching and stapling are also possible. You can even perform saddle stitching for booklets up to 60 pages.

**Functional Styling**

The new bizhub 501’s design is a fresh take on traditional business machines, featuring sleek styling that complements your office interior. The bizhub 501 is available in two versions, a black and a white model, each with a distinctive design.

**New Universal Design Concepts**

bizhub has always adopted a philosophy of complete universal access, and the new bizhub design continues this tradition with new innovations. The new bizhub 501 has a new design that makes it easier to access all functions, and a new color display panel with touch-screen gives users the ability to preview before they print or send documents, and makes navigation to desired documents simple and intuitive.

04 New Design
The bizhub Style of Business
bizhub 501 takes centre stage with a radically new design. Incorporating new functional elements and refinements to provide complete access, blended with sleek styling that complements your office interior, the new bizhub is built to impress.

03 Scanning Speed
Using the convenient ADF allows high-speed single-sided or double-sided scanning at up to 70ipm. Different-size documents can even be mixed together, and the precision feeding mechanism and anti-static measures ensure continuous high-quality results.

05 Dependable Output
With an output speed of 50ppm, the bizhub 501 can meet the needs of even the most demanding office environments. Both models offer high-quality document creation, with copy resolution of 600dpi x 600dpi, and digital smoothing enabling print resolution of 2400dpi equivalent x 600dpi.

06 Energy Conservation
The bizhub 501 complies with the International Energy Star Program’s stringent guidelines for reduced energy consumption and improved efficiency.

07 New Universal Design Concepts
A wide array of optional finishing units allow you to produce professional-looking, high-quality documents that will increase the value of your output immeasurably. In addition to sorting and grouping, folding, hole punching and stapling are also possible. You can even perform saddle stitching for booklets up to 60 pages.

08 Work Green
Because the global environment is just as important as the office environment, Konica Minolta is committed to minimising the environmental impact of our devices on all fronts. The bizhub 501 is the ideal choice for offices that wish to reduce waste and emissions without trading performance.

09 Ecology & Environment
The bizhub 501 is currently undergoing certification for Blue Angel (BAM2004) guidelines for efficiency and environmental responsibility. Konica Minolta will comply with RoHS (Reduction of Hazardous Substances) rules prohibit certain materials from being used during the production of electrical and electronic components. Konica Minolta will comply with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

10 Energy Star
The bizhub 501 complies with the Energy Star Program’s stringent guidelines for efficiency and environmental responsibility.

11 Blue Angel
The bizhub 501 is currently undergoing certification for Blue Angel (BAM2004) guidelines for efficiency and environmental responsibility.

12 RoHS Compliance
RoHS (Restriction of Hazardous Substances) rules prohibit the use of certain materials, including lead, mercury, cadmium, hexavalent chromium, PBB and PBDE.

13 Emissions reduction
Polymers produce fewer emissions than conventional toner, with a total reduction of up to 40% for NOx, SOx and CO2. In addition, the production of energy efficient bizhub devices has also been optimised to reduce overall emissions.

14 Simitri Toner
Konica Minolta’s exclusive Simitri polymerised toner uses smaller, more uniform particles than conventional toner, resulting in sharper text lines and finer gradations. Simitri toner also has a lower fixing temperature, enabling faster output, lower energy use, and reduced paper curling.

15 Energy Star
The bizhub 501 complies with the Energy Star Program’s stringent guidelines for reduced energy consumption and improved efficiency.

16 WEEE Compliance
The bizhub 501 complies with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

17 Blue Angel
The bizhub 501 is currently undergoing certification for Blue Angel (BAM2004) guidelines for efficiency and environmental responsibility.

18 RoHS Compliance
RoHS (Restriction of Hazardous Substances) rules prohibit certain materials from being used during the production of electrical and electronic components. Konica Minolta will comply with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

19 Emissions reduction
Polymers produce fewer emissions than conventional toner, with a total reduction of up to 40% for NOx, SOx and CO2. In addition, the production of energy efficient bizhub devices has also been optimised to reduce overall emissions.

20 Simitri Toner
Konica Minolta’s exclusive Simitri polymerised toner uses smaller, more uniform particles than conventional toner, resulting in sharper text lines and finer gradations. Simitri toner also has a lower fixing temperature, enabling faster output, lower energy use, and reduced paper curling.

21 Energy Star
The bizhub 501 complies with the Energy Star Program’s stringent guidelines for reduced energy consumption and improved efficiency.

22 WEEE Compliance
The bizhub 501 complies with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

23 Blue Angel
The bizhub 501 is currently undergoing certification for Blue Angel (BAM2004) guidelines for efficiency and environmental responsibility.

24 RoHS Compliance
RoHS (Restriction of Hazardous Substances) rules prohibit certain materials from being used during the production of electrical and electronic components. Konica Minolta will comply with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

25 Emissions reduction
Polymers produce fewer emissions than conventional toner, with a total reduction of up to 40% for NOx, SOx and CO2. In addition, the production of energy efficient bizhub devices has also been optimised to reduce overall emissions.

26 Simitri Toner
Konica Minolta’s exclusive Simitri polymerised toner uses smaller, more uniform particles than conventional toner, resulting in sharper text lines and finer gradations. Simitri toner also has a lower fixing temperature, enabling faster output, lower energy use, and reduced paper curling.

27 Energy Star
The bizhub 501 complies with the Energy Star Program’s stringent guidelines for reduced energy consumption and improved efficiency.

28 WEEE Compliance
The bizhub 501 complies with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

29 Blue Angel
The bizhub 501 is currently undergoing certification for Blue Angel (BAM2004) guidelines for efficiency and environmental responsibility.

30 RoHS Compliance
RoHS (Restriction of Hazardous Substances) rules prohibit certain materials from being used during the production of electrical and electronic components. Konica Minolta will comply with WEEE (Waste Electrical and Electronic Equipment) regulations, ensuring that all parts and components are properly disposed of or recycled.

31 Emissions reduction
Polymers produce fewer emissions than conventional toner, with a total reduction of up to 40% for NOx, SOx and CO2. In addition, the production of energy efficient bizhub devices has also been optimised to reduce overall emissions.

## Warm-up time
- Copy: back-end / within 6mm, others / within 3mm
- First copy time: 3.2sec. or less
- 50cpm (A4), 27cpm (A3)
- Approx. 6.8kg
- Transmission speed: 2.0 sec (A4 / detailed mode)
- 1,000 numbers (with HD-509), 500 numbers (without HD-509)
- 200 numbers
- 1,000 numbers
- 2,000 numbers (with HD-509), 1,000 numbers (without HD-509)
- 1,000 numbers
- 2,000 numbers
- 1.56kW or less
- 685mm x 823.7mm x 895mm
- pH 7.0 to 9.0
- 200x100dpi, 200x200dpi, 400x200dpi, 600x600dpi
- 200x100dpi, 200x200dpi, 400x200dpi, 600x600dpi
- 200x100dpi, 200x200dpi, 400x200dpi, 600x600dpi
- 2.0 sec (A4 / detailed mode)
- Push Scan: SMTP, FTP, SMB, WebDAV
- Windows NT4.0 SP6/2000, SP3/XP/XP64bit/Server2003/Server2003 64bit/Vista or later,
- MacOS 9.2 or later/X 10.2,3,4/10.4 Intel or later
- PCL: 80 fonts, PS: 136 fonts
- Ethernet 10BASE-T / 100BASE-TX / 1000BASE-T, USB1.1 (Standard) / 2.0 (Optional)
- IP Address Fax (Option) Specifications
- (Optional FK-502, MK-708, IC-207, HD-509 required)
- 1-999 sheets
- Stackless ADU
- A3-A5, 60-90g/m
- TCP/IP, SMTP
- AC220-240V 10A (50Hz)
- 685mm x 823.7mm x 895mm
- Approx. 97kg
- Max. A3 200×100dpi, 200×200dpi, 400×200dpi, 600×200dpi
- 200x100dpi, 200x200dpi, 400x200dpi, 600x600dpi

## Fax Function Specifications
- (Optional FK-502, MK-708 required)
- 2.0 sec (A4 / detailed mode)
- Push Scan: SMTP, FTP, SMB, WebDAV
- Windows NT4.0 SP6/2000, SP3/XP/XP64bit/Server2003/Server2003 64bit/Vista or later,
- MacOS 9.2 or later/X 10.2,3,4/10.4 Intel or later
- PCL: 80 fonts, PS: 136 fonts
- Ethernet 10BASE-T / 100BASE-TX / 1000BASE-T, USB1.1 (Standard) / 2.0 (Optional)
- IP Address Fax (Option) Specifications
- (Optional FK-502, MK-708, IC-207, HD-509 required)
- 1-999 sheets
- Stackless ADU
- A3-A5, 60-90g/m
- TCP/IP, SMTP
- AC220-240V 10A (50Hz)
- 685mm x 823.7mm x 895mm
- Approx. 97kg
- Max. A3 200×100dpi, 200×200dpi, 400×200dpi, 600×200dpi
- 200x100dpi, 200x200dpi, 400x200dpi, 600x600dpi

## Scanning Function Specifications
- Send size
- Max. A3
- SIZE OF ORIGINALS
- Scan resolution
- Speed (A4 crosswise)
- Main functions
- Record size
- Transmission standard
- Line density
- Interface
- 200x100dpi, 200x200dpi, 400x200dpi, 600x600dpi
- Scan to Web DAV, Scan to USB memory, Network TWAIN
- Ethernet 10BASE-T / 100BASE-TX / 1000BASE-T
- Transmission speed
- Modem speed
- Data compression method
- Communication line
- Scanning speed
- Speed dial
- Push Scan: SMTP, FTP, SMB, WebDAV

## System Options
- *Attaches to the FS-522 for increased sorting options*
- Local Interface Kit EK-703
- Punch Unit PU-501
- Image Controller IC-207
- Working Table WT-502
- Fax Kit FK-502
- Fax Mount Kit MK-708
- Output Tray OT-504
- Finisher FS-522
- Fax Multi Line ML-503
- Large Capacity Unit LU-203
- stapling and folding
- Biometrics Authentication
- Relay Unit RU-507
- IC Authentication Kit AU-201
- Mailbin Kit MT-502
- Paper Feed Cabinet PC-206
- Paper Feed Cabinet PC-407
- Staples up to 50 pages per set
- Holds up to 100 sheets, can only be used when no other finishers are attached
- Holds up to 2,000 sheets of A4 paper
- staples up to 50 pages per set, punch holes
- *Can only be used when the Paper Feed Cabinet PC-206 or PC-407 is attached*
- Staples up to 50 pages per set, can only be used when no other finishers are attached

## Ecology & Environment
- KONICA MINOLTA products are designed with the environment in mind.
- Energy Star
- Production at ISO Certified Factories
- ISO14048 (EAL Level 2) Certification
- These products comply with the security requirements of ISO14048 (EAL Level 2).
- The EAL4 certification applies to EAL security capability. The certification is not valid for system capability.

From consulting, system design, to operations, Konica Minolta offers total support to optimise your office output environment.
