More flexibility to your workflow

Easy-to-see, easy-to-use 10.1 inch panel
The large 10.1 inch panel ensures quick and easy operation. The interface helps to reduce operational errors, this user-friendly panel enhances everyday work.

Product design
The bizhub C658 series adopts the easy and intuitive INFO-Palette design. Its unified user interface provides a consistent user experience in any business situation across a multitude of devices such as PCs, tablets and smartphones.

Faster scanning speed and precise outputs create smooth workflow
The ADF features a 300-sheet paper holding capacity and impressive duplex 240 opm (120 sheets for double-sided) scan speed. Its high productivity supports business efficiency and speed, while its instant scanning and copying meet customers’ high-volume needs.

Optional paper feed output options
The standard paper capacity of the MFP is 1,150 sheets. With the optional paper feed options, the paper capacity can be increased up to 3,650 sheets. The optional Large Capacity Unit will bring the maximum to 6,650*1 sheets to reduce overall MFP downtime caused by paper replenishment.

*1 When optional Paper Feed Cabinet PC-415 and Large Capacity Unit LU-302 are mounted.

Standard web browser
The multi-touch UI in the operation panel can be used to display and print out web page content. It is convenient for printing pages from PDF files that can be viewed on websites, or for printing maps of places you are about to visit.

All-in-one compact finisher enables diverse output
The FS-537 finisher houses all output options within a body less than 1,400mm wide to meet diverse output requirements while simplifying installation and deployment. Even jam occurs in the finisher, purge function automatically eject the jammed paper to the inner output tray.

Optional Double feed detection Kit UK-501 is required.

Advanced security technology protects important information

Authentication on the MFP main unit

Authentication can be performed directly on the main unit. Detailed access control can be set up for each function, including copy, print, scan and fax*.

* Optional Fax Kit FK-514 is required.

IC card authentication

Authentication is possible*2 with various types of IC card*2, including cards that comply with the SSFC (Shared Security Formats Cooperation) standard. Besides the IC card, authentication can also be performed with any Android device*2 equipped with an NFC antenna.

*2 Optional Authentication Unit AU-2015 is required.
*3 Compliant non-contact IC cards include FeliCa (IDm), SSFC, FCF, FCF (campus), FeliCa Private, and MIFARE (UID).
*4 Requires Android 4.4 or later that supports HCE (Host Card Emulation) or PageScope Mobile for Android v4.1 or later.

Biometric authentication

Your finger veins become the most accurate authentication tool. Biometric authentication is easy to implement, but offers very high-level security.

* Optional Biometric Authentication Unit AU-102 and Working Table WT-506 are required.

Server-less pull printing

Print jobs sent by users can be printed from any MFP in the office print group. This allows users to build a server-less pull printing system more easily and at low initial cost.

* A pull printing system consisting of a maximum of 10 MFPs can be created. All corresponding MFPs must be in the same network.
* Optional i-Option LK-114 is required to be installed in each MFP.

HDD mirroring

Supports “Mirroring”, which synchronises main HDD data and backup HDD data in real time. In the event of main HDD failure, operation automatically switches to the backup HDD to drastically reduce the risk of data loss.

* Optional HDD Mirroring Kit HD -524 is required.

TPM (Trusted Platform Module)

Control confidential information with a TPM (Trusted Platform Module) security chip that encrypts and decrypts confidential data. Encrypted confidential information is stored in a dedicated storage area in the chip to prevent unauthorised reading from external devices.

* Optional i-Option LK-115 v2 is required.
High-precision, smarter operation

Emperor printing system

Konica Minolta’s proprietary Emperor unified printing system is standard embedded with network printing functions. It provides a comfortable printing experience in any office network environment regardless of OS used.

Fiery controller

Optional Fiery Image Controller*1 for graphics applications can produce a professional, high-level print quality environment. The controller’s various settings can be configured by using the MFP web browser.

*1 Optional Fiery Image Controller IC-416 and Video Interface Kit VI-510 are required.

Efficient use of electric power and recycled materials, additional value of TCO (total cost of ownership) reduction

Usage of recycled materials

Konica Minolta has made further advances in its unique chemical processing technology. It has also increased its use of recycled PC/PET with a higher PCR ratio*1 of approximately 70%. What is more, our use of recycled ABS resin has increased the PCR ratio for internal materials to approximately 95%. This recycled material accounts for more than 35% of the total weight of resin in the main unit and covers approximately 88% of the outer surface area of the machine.

*1 PCR (post-consumer recycling): the ratio of municipally recycled materials used in the recycled materials.

Top-class power consumption and class-leading TEC value

The MFP CPU turns off in sleep mode to deliver a top-class 0.5W power consumption ratio. The TEC value has also been reduced approximately 14-20%, which helps reduce CO2 emissions.

Comparison of TEC values (in Europe and other regions) of previous models (bizhub C654e/C554e/C454e) and the bizhub C658 series.
