Giving Shape to Ideas
Solutions for reducing TCO, the environment … and even for improving productivity

For corporations that not only want to reduce TCO and be environmentally friendly, but want to boost office productivity as well, Konica Minolta balances the three to a higher dimension with the ideal solution.

A new work style for the ever-changing office environment

- **Print and receive with mobile devices wirelessly**
  PageScope Mobile provides a smart bizhub printing environment for the rapidly growing mobile market.

- **A new user interface for intuitive flick & drag operation**
  The bizhub C754/654’s new user interface adopts the same flick & drag operation used in mobile devices. Operations will be intuitive from day one.

- **Direct Print and Scan to PowerPoint for Microsoft Office files**
  Print even Microsoft Office docx, xlsx and pptx files without starting any applications from a PC with Direct Print. And streamline documentation by instantly turning hardcopies into PowerPoint data with Scan to PowerPoint.
  * Microsoft Office 2007 or later.

- **Flexible and diversified security**
  From IC card authentication, which uses employee IDs, to finger vein authentication, which requires no cards or passwords, the bizhub C754/654 offer diverse security management from various perspectives.

Trouble-free power, paper and cost savings

- **Class leading low power consumption**
  The bizhub C754’s and C654’s power consumptions are significantly lower than the Energy Star Program’s TEC standard value respectively. Lower energy costs will help reduce operating costs.

- **See the paper and power savings with the eco meter**
  The bizhub C754/C654 employ an eco meter that calculates the ecological contribution through paper and power reductions.

- **Reduce wasted power with the weekly timer’s learning function**
  The weekly timer, which rationally saves power when the bizhub is not in use, now includes a learning function. It intricately cuts power consumption by learning and adjusting the settings to real-time use.
**Easy output solutions for a mixed multi-device environment**

- **Centrally manage various devices with an integrated management application**
  PageScope Enterprise Suite is a one-stop solution that integrates and centrally manages various output devices including MFPs and printers.

- **A user interface that provides common operations across devices**
  The new user interface and driver window deliver the same operations for all bizhubs in the office, including devices on other floors.

- **Share solution applications across devices**
  The C754/C654 employ bEST (bizhub Extended Solution Technology), Konica Minolta’s bizhub OP (Open Platform) that provides a variety of solution applications that can be used among different devices worldwide.

---

**Boost business quality and productivity**

- **No more waiting with high-speed processing**
  With 60 ppm colour outputs, 180 opm simultaneous duplex scanning, 23-second or less warm-up times and high-speed multi-tasking, the bizhub C754/654 deliver jobs without delay.

- **Convincingly high image quality for text, photos and graphs**
  High-resolution 1,200 dpi outputs not only improve reproduction quality of photos and graphs, but also make small text and fines lines in business documents more legible.

- **Add more value to business documents with a selection of finishing systems**
  Select from a variety of optional finishing systems, including the compact FS-534 which offers colour 3-sheet tri-fold, a booklet function, hole punching and stapling for up to 50 sheets. The highly functional FS-535 goes even further with stapling for up to 100 sheets and a post inserter.
Solid reliability even for heavy use

The bizhub C754/C654's strength and reliability go beyond the realm of office use by firmly meeting the heavy uses of corporate printing rooms and light production houses. They drastically reduce downtime and provide stable long-term operation.

Meeting the needs of heavy users

- Improve total productivity
  Boost productivity by reducing downtime. The bizhub C754/C654 are built to handle extended operation times and mass outputs.

- Functionality for professional printing
  Whether for A3 full-bleed outputs, index paper support, high resolution 1,200 dpi outputs, an upright panel for better operation, or a Fiery controller for graphic users, the bizhub C754/C654 boast ample functionality as an on-demand machine to meet the needs of light production houses.
